

The Rio Metro board of directors is responsible for carrying out the functions conferred by the provisions of the state's Regional Transit District Act. These functions include the establishment of a regional transit system that is compatible with established state and local transportation plans; the development of policies and procedures to support the establishment of this system; and the development of a sound financial plan that provides for the capital, operating and maintenance requirements of this system.

 [Rio Metro Board of Directors membership listing](#)

The Board of Directors understands that the regional transit district has a need for public transportation services that address both local and regional needs. In order to provide public transportation services that address these needs and as a means to allow maximum local community input, Service Sector Councils have been formed. These councils will assist in developing service plans, assist in monitoring operational performances, and provide input on local and regional public transportation needs.

The following governmental entities constitute Rio Metro:

- County of Sandoval
- County of Bernalillo
- County of Valencia
- City of Albuquerque
- City of Rio Rancho
- City of Belen
- Town of Bernalillo
